SharePoint 2019

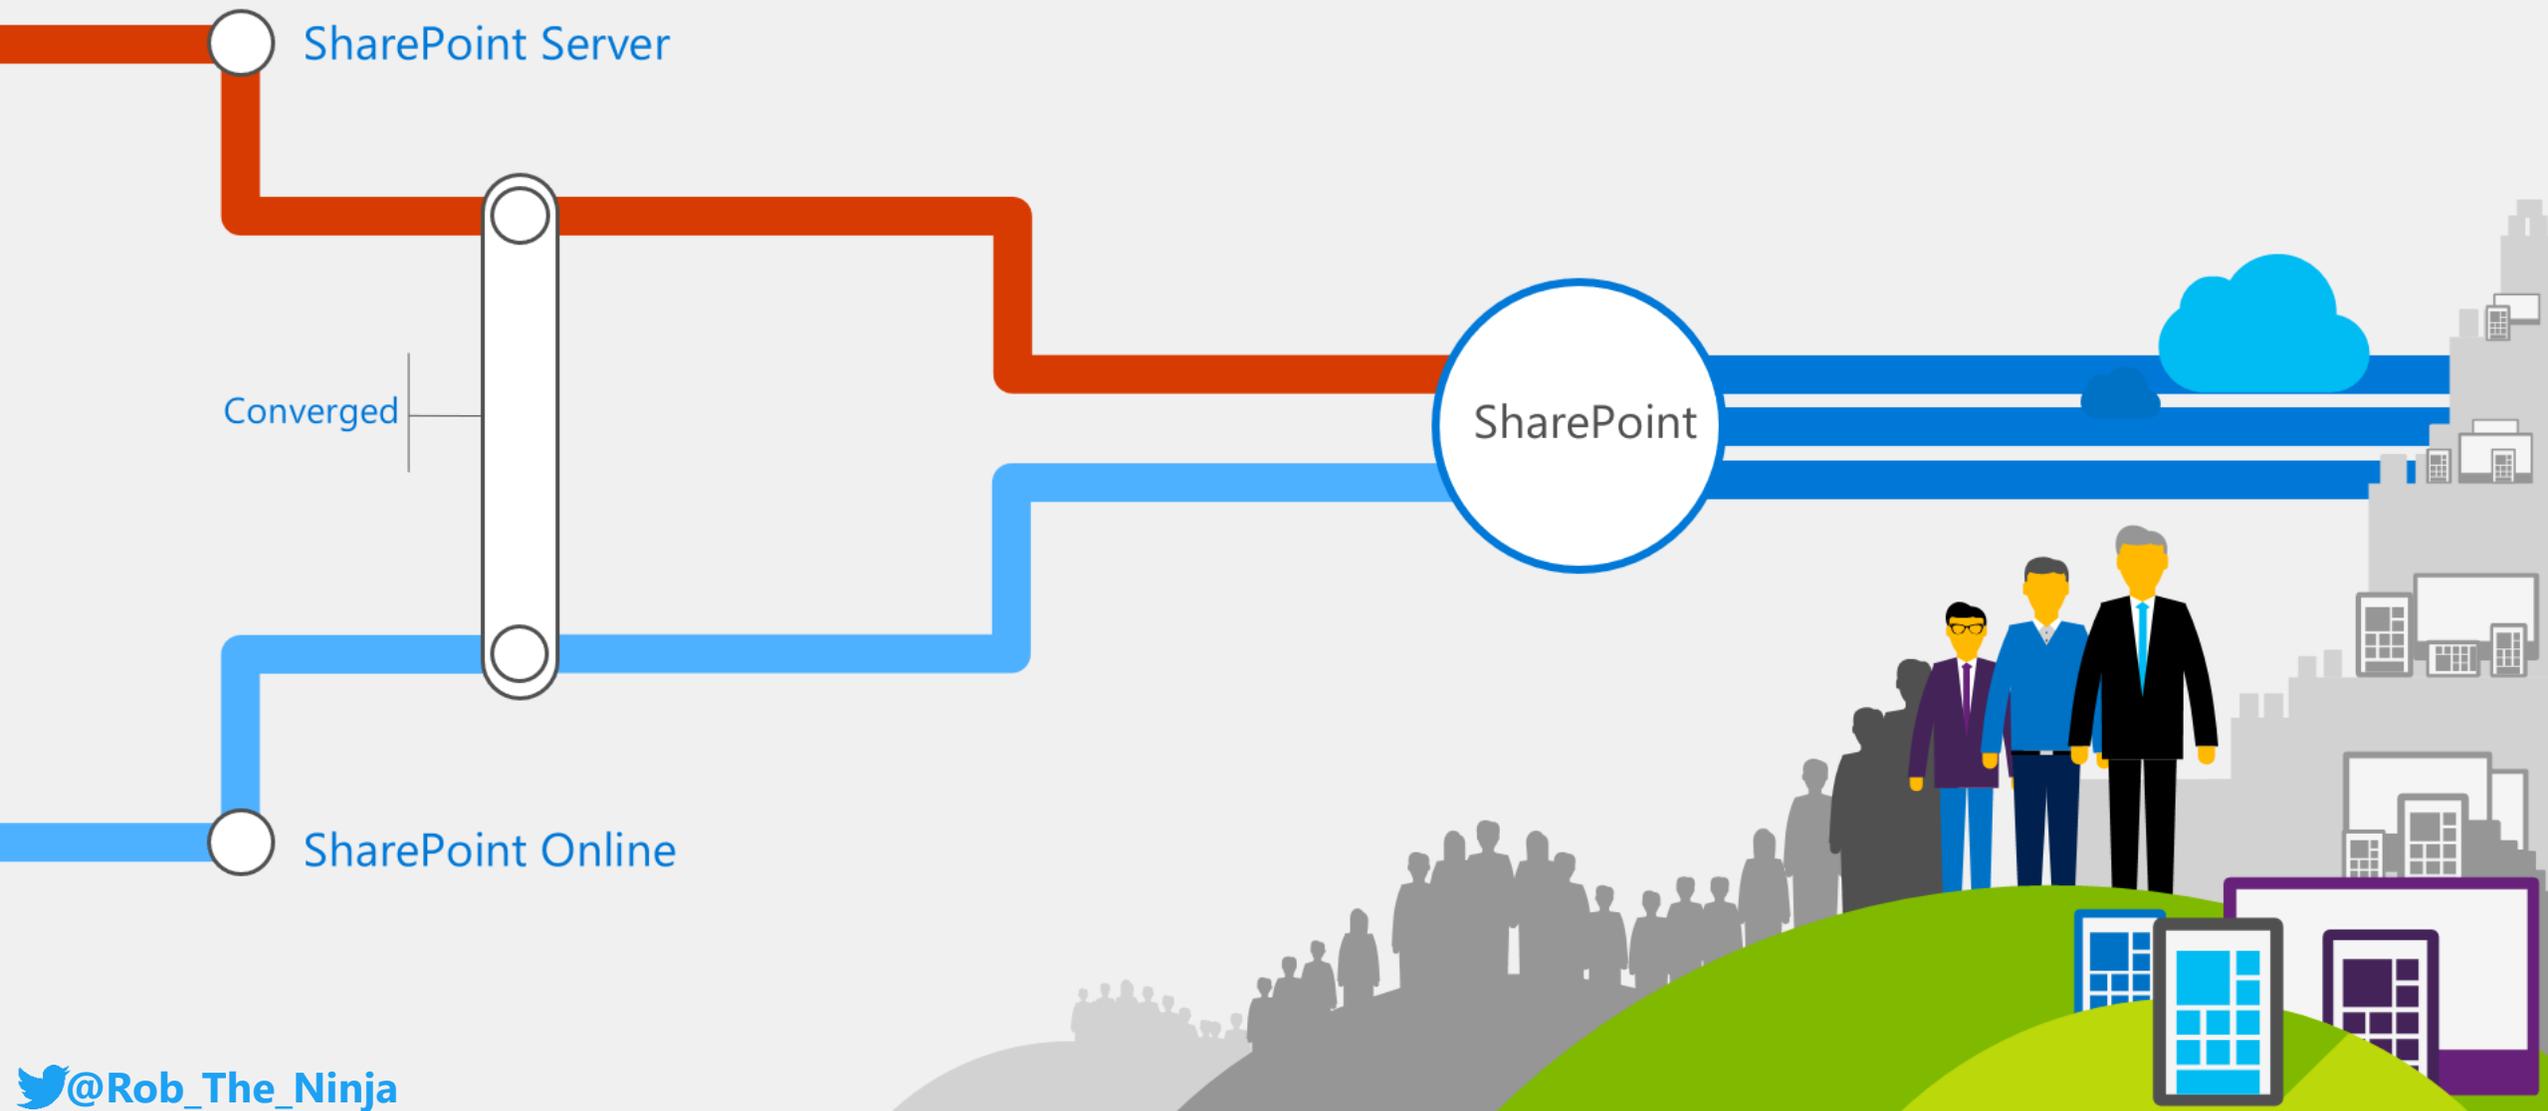

The Story behind

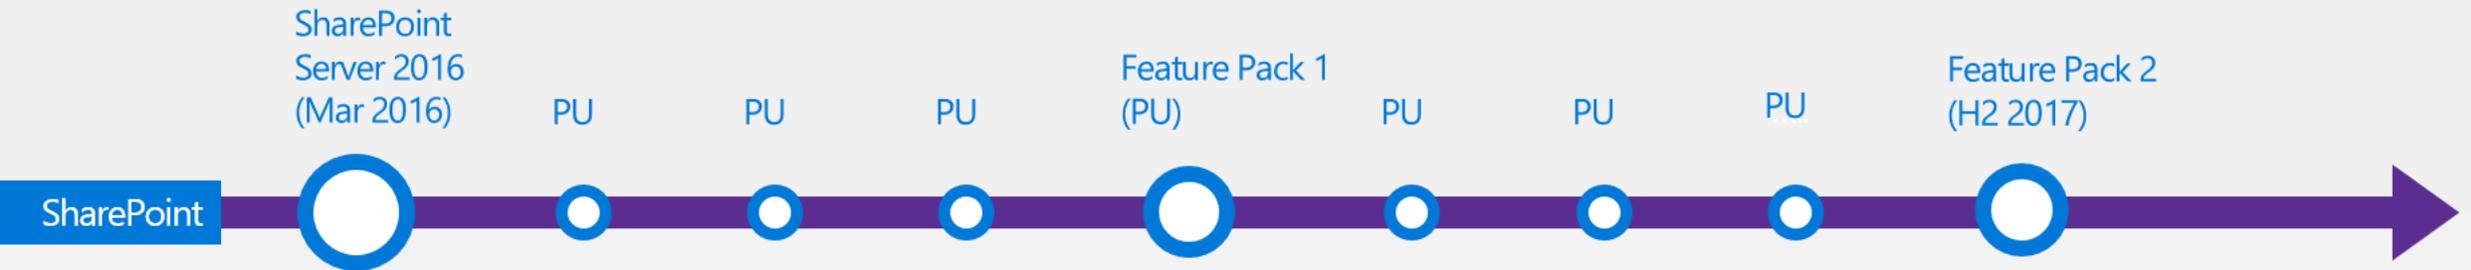

Intelligently discover, share, and collaborate.

SharePoint 2019 – The Story behind

SharePoint 2016/~~2019~~ – Release Cadence

SharePoint 2016 has a converged code base that serves both cloud and on-premises customers

Features are released in Office 365 first
SharePoint Server 2016 will be serviced with many of these features

Major releases remain on a traditional 2-3 year release cycle

Release	Frequency	Contents
Security Update	As required	Security fixes
Public Update	Monthly	Bug fixes, new features from cloud
Major Release	Every 2-3 years	New features

Technical Requirements

Technical Requirements

Hardware

1. 64-bit Processor, 4 cores
2. Memory 12-16 GB minimum, recommend 24+ GB
3. Drives capacity 80+ GB on system, 100+ GB on second and additional drives

Database

1. 64-bit version
2. SQL ~~2014 SP1~~, 2016, or 2017

Software

Pre-Requisites:

1. .NET Framework 4.7.2 (~~3.5; 4.6~~)
2. IIS 7 only, **no IIS 6 Components needed any more**
3. SQL 2012 SP4 Native Client (~~SP1~~)
4. Microsoft Identity Extensions
5. WCF Data Services 5.6
6. Windows App Fabric 1.1 CU7
7. Visual C++ for Visual Studio 2012, ~~2015~~, 2017

Operating Systems:

1. Windows Server ~~2012 R2~~, 2016, or 2019 Standard or Datacenter

Benefits of Migration

Improved collaboration scenarios

- Modern Modern Modern !!!
 - Team Sites
 - Collaboration Sites + Team News
 - Lists + Libraries
 - Web parts
 - SharePoint Home
 - Self-Service Site Creation
 - Suite Navigation and App Launcher
 - Simplified Sharing (+ Durable Links)

The screenshot displays the SharePoint 2019 user interface. At the top, the page title is 'Intranet 2019'. The left sidebar contains navigation options: Home, Documents, Pages, Site contents, Recycle bin, and Edit. The main content area features a large banner with the text 'SharePoint 2019 is Here' and a paragraph of text: '...ng for is finally here: Microsoft has officially announced the availability of [SharePoint Server 2019](#).' Below the banner is a section titled 'Announcing SharePoint Server 2019' with four icons representing different features: OneDrive Files On-Demand, Modern team sites, Communication sites, and Hybrid made easy. At the bottom, a 'Section layout' panel shows various grid configurations: One column, Two columns, Three columns, One-third left column, and One-third right column. A 'Comments' toggle is visible at the bottom right of the page.

Benefits of Migration

✓ Unleash the full potential of SharePoint. [Click here to enable Hybrid experiences.](#)

Search Improvements

- Intuitive filters
- Hybrid-Only:
Type-ahead contextual results

Enhanced Hybrid

- Improved Hybrid configuration
→ Hybrid Status Bar
- Hybrid Taxonomy
- Profile Redirection

The screenshot displays the SharePoint interface for an Intranet 2019 site. The top navigation bar includes the SharePoint logo, the site name 'SharePoint', and the user profile 'Robert Mulsow'. Below the navigation bar, the breadcrumb trail shows 'HR' and 'Intranet 2019'. A search filter dropdown menu is open, showing 'All file types' selected, with other options including Word, Excel, PowerPoint, PDF, Image, and Other types. The main content area is titled 'Files on site Intranet 2019' and lists several documents:

- HR_Manager_Hiring_Guide** (PDF): Service Pack 7, Cumulative Update 1... Effective management and automation of release operations to promote content, customizations, and design elements on Intranet 2019 | updated by Administrator on 9/1/2016

Benefits of Migration

Mobile First

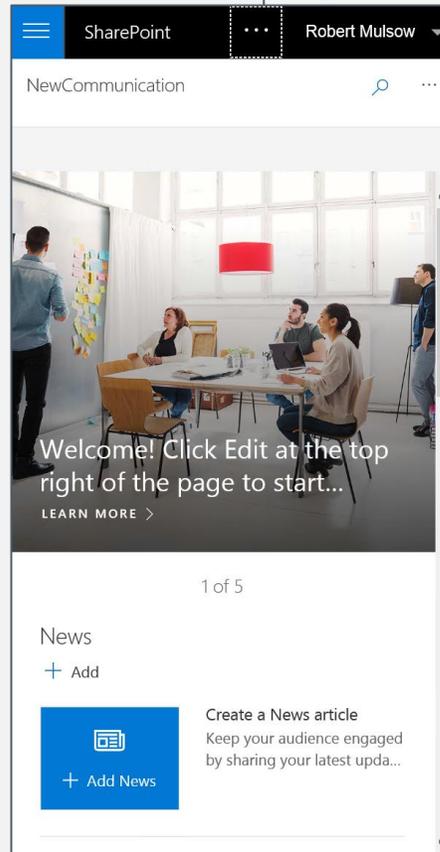

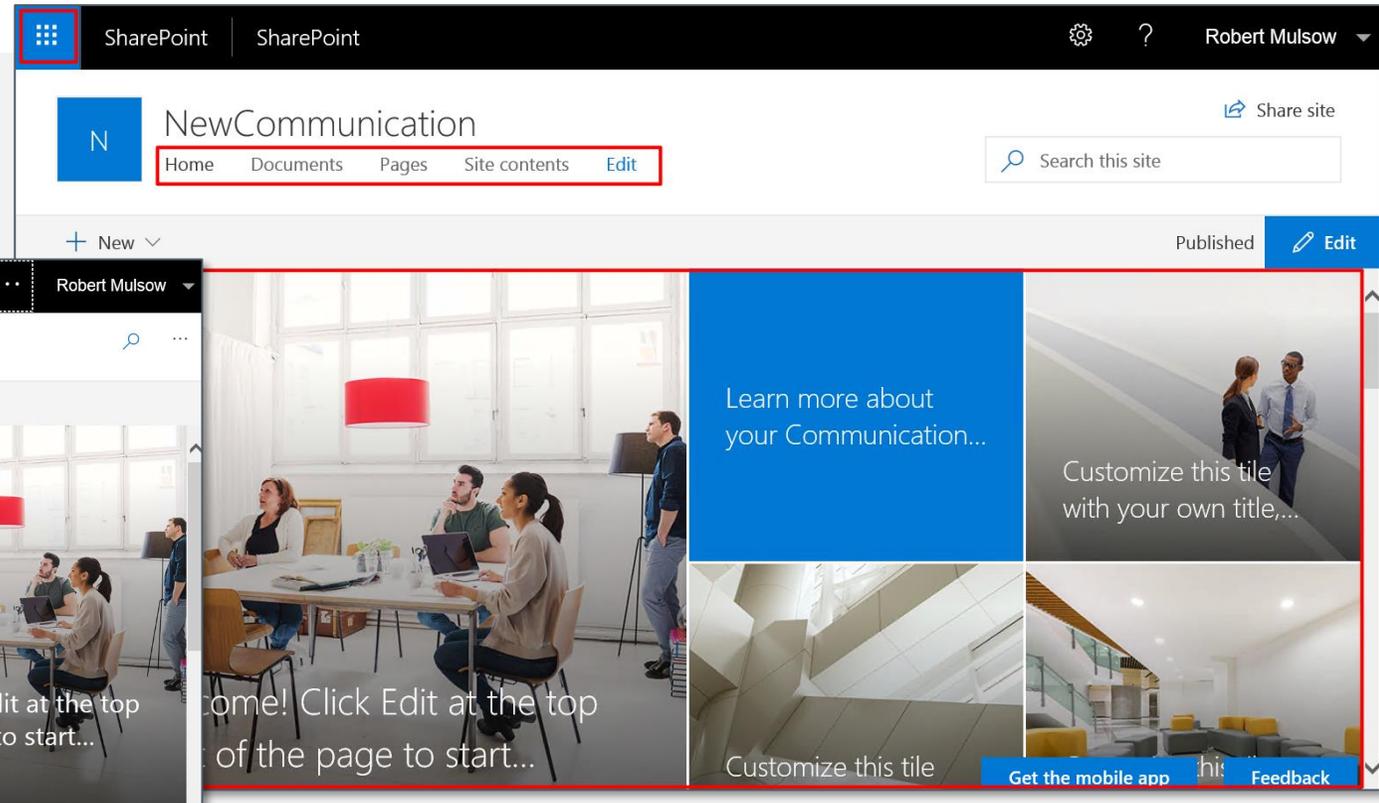

- Responsive Design
- SharePoint Mobile App

SharePoint Places

- Virtual Reality in your intranet
- Searching for use cases...

Customizations

- Add custom web parts
- Use Modern SPFx Framework

Benefits of Migration

Compliance

- Compliance Center for Lifecycle and DLP policies
- eDiscovery for DLP Search
- 10 pre-configured sensitive information types, like UK PII
- Apply policy templates to Site Collections

Deletion Policies

Create and manage deletion policies for site collections or site collection templates. Selection required.

Name	Mode	Modified
Sample MySite Policy		September 4
Sample Document Policy		September 4

Data Loss Prevention Policies

Create and manage data loss prevention (DLP) policies to help protect the sensitive content in your organization. For example, you can set up a policy that displays a policy tip to users if they save documents that contain personally identifiable information (PII).

Name	Mode	Modified
PII Data	Enforce	September 4
US SSN	Enforce	September 4
UK Financial Data	Enforce	September 4

New DLP Policy

Name: *

Choose the template corresponding to the type of content you want to find:
[Learn more about these templates.](#)

- U.S. Personally Identifiable Information (PII) Data
- U.S. Gramm-Leach-Bliley Act (GLBA)
- PCI Data Security Standard (PCI DSS)
- U.K. Financial Data**
- U.S. Financial Data
- U.K. Personally Identifiable Information (PII) Data
- U.K. Data Protection Act
- U.K. Privacy and Electronic Communications Regulations
- U.S. State Social Security Number Confidentiality Laws
- U.S. State Breach Notification Laws

About this template:

U.K. Financial Data

Description: Helps detect the presence of information commonly considered to be financial information in United Kingdom, including information like credit card, account information, and debit card numbers.

Protects this information: Credit Card Number, EU Debit Card Number, SWIFT Code

Show results only if the content contains this many instances of a particular sensitive information type - for example, five credit card numbers.

Send an incident report to these people when new content is saved or edited:

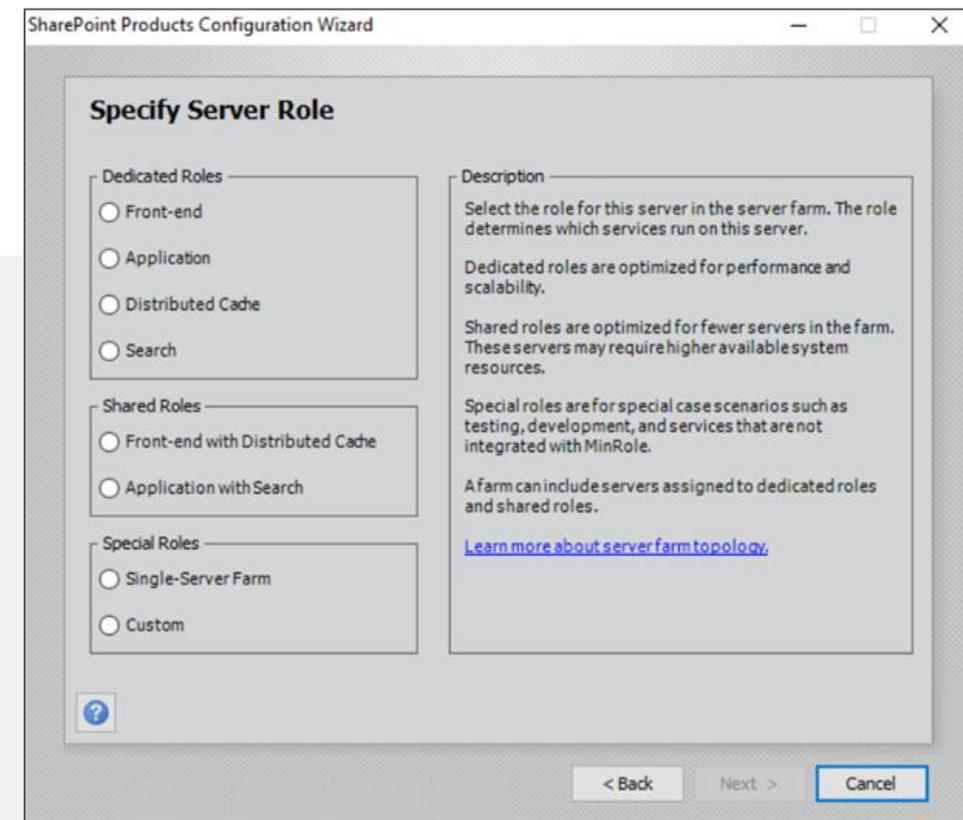

Benefits of Migration

Further SharePoint 2019 Enhancements

Central Administration (Backend):

- Additional links for further documentation in Central Admin
- New SharePoint Health Analyzer Rules + PowerShell cmdlets
- Access Service 2013 will be able to send E-Mails
- Fast site creation for:
 - OneDrive personal [site SPSPERS#10]
 - Team site (modern only) [STS#3]
 - Communication site [SITEPAGEPUBLISHING#0])
- Distributed Cache background caching enabled by default
- MinRole v2 architecture + Zero Downtime Patching
- SMTP server authentication
- Improved Telemetry for Privacy settings

Benefits of Migration

Further SharePoint 2019 Enhancements

User Experience:

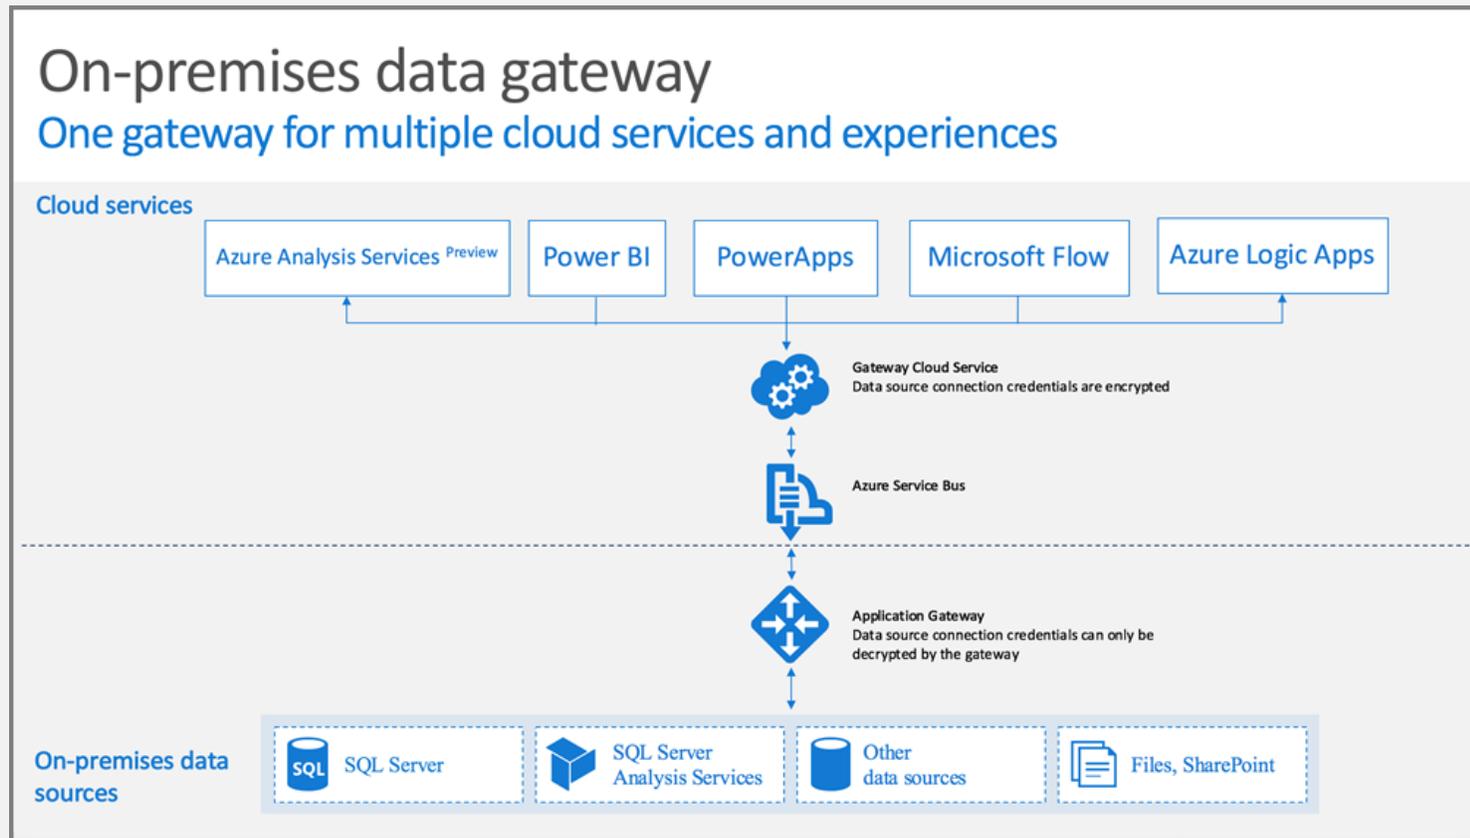

- Being able to create modern pages even on classic sites
- PDF Viewer
- Recycle Bin Improvements (being able to recover your content deleted by others)
- Increased storage size to 15 GB
- # and % will be supported as special characters for files and folders
- Character limit increased from 260 to 400 for URLs
- Start Yammer conversations out of SharePoint
- Sharing E-Mail Template
- Visio Services Keyboard Shortcuts

Benefits of Migration

OneDrive, Microsoft Flow, PowerApps, Project

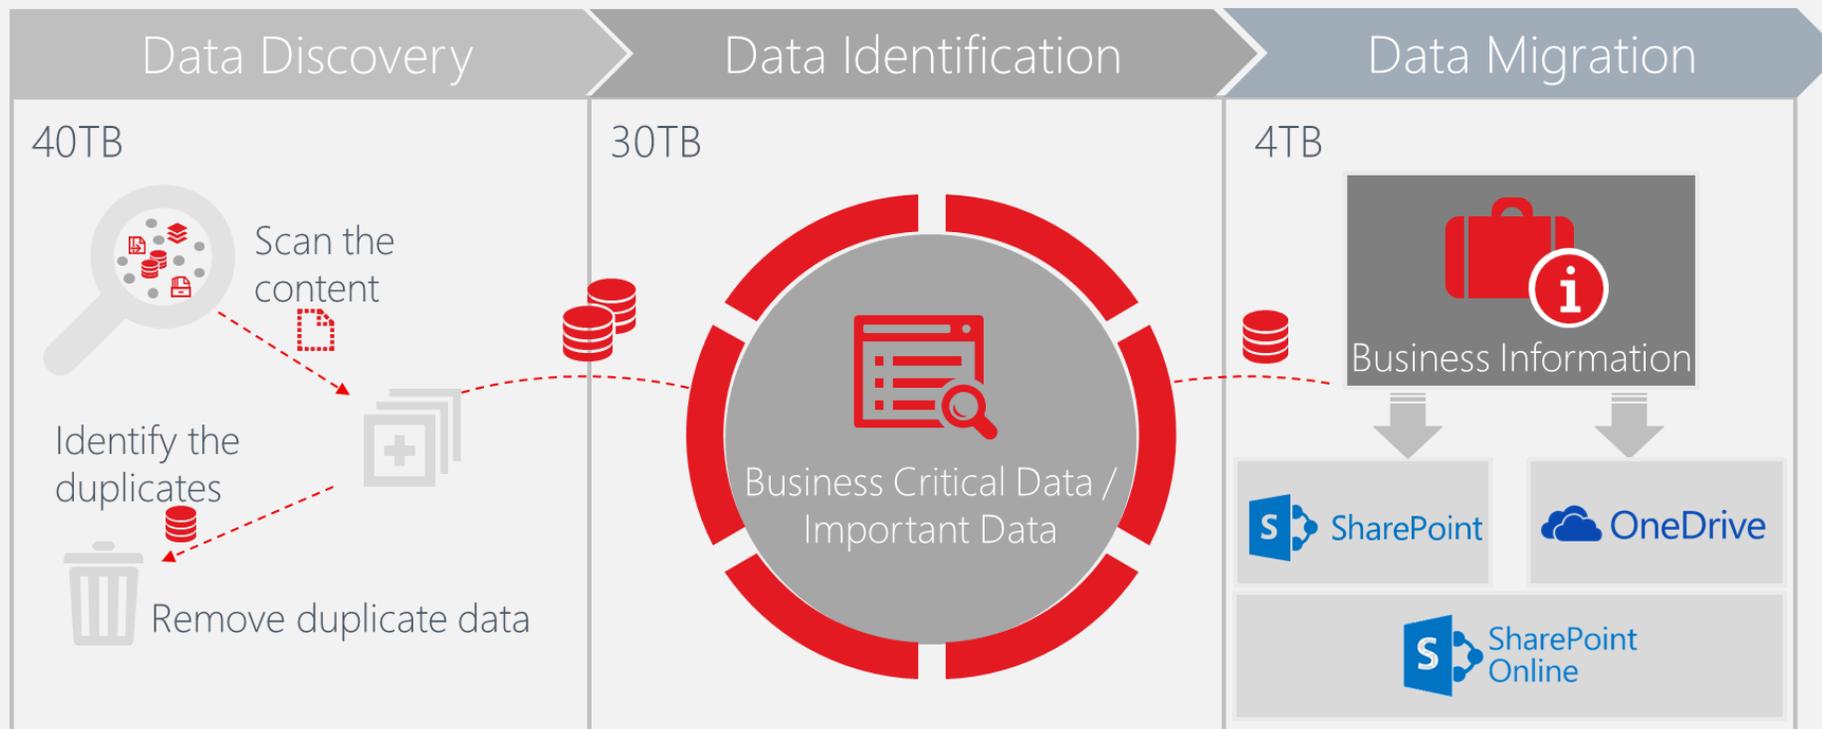

- Sync On-Premises SharePoint files with latest OneDrive NGSC (+ hybrid)
- Map and improve existing legacy processes to workFLOWS and PowerApps
→ needs concerning Flow and/or PowerApps Licensing
- Project is fully integrated
→ licensed separately
→ track deliverables across SharePoint, Microsoft Outlook, and Microsoft Project

Benefits of Migration – Operational

Spring Cleaning

- Archive outdated, obsolete and unnecessary data
- Understanding, how your SharePoint is being used

Benefits of Migration – EOL!

Deprecated Features

- Access Services (2010 & 2013)
- Aggregated Newsfeed (read-only)
- Custom Help
- Groove Sync Client
- InfoPath Services (EOL 2026)
- List Web Service
- Machine Translation incl. Variations
- Performance Point Services
- SharePoint Designer 2013 (EOL 2026)
- Site Mailbox
- Site Manager

Removed Features

- Code Based Sandboxed Solutions
- Digest Authentication
- Incoming Email automatic mode
- Multi-Tenancy
- PowerPivot Gallery and Refresh
- Visio Services – Silverlight Based Rendering

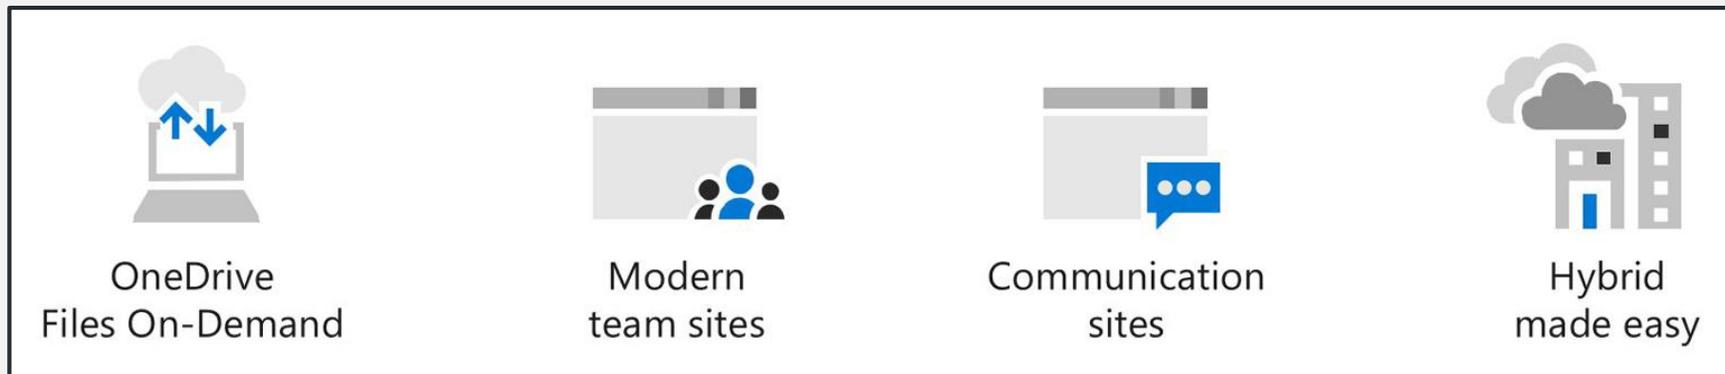

Demo Time

Summarized, what will we get...

SharePoint 2019 is made for...

1. Enable productive experiences across desktop and mobile
2. Provide a scalable and flexible collaboration and communications platform
3. Increase productivity with an intuitive user experience

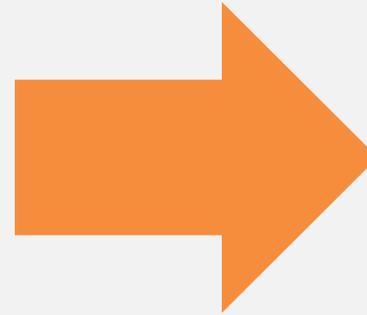

Summary, Recommendations, Next Steps

Understanding, how your SharePoint is being used, gives you...

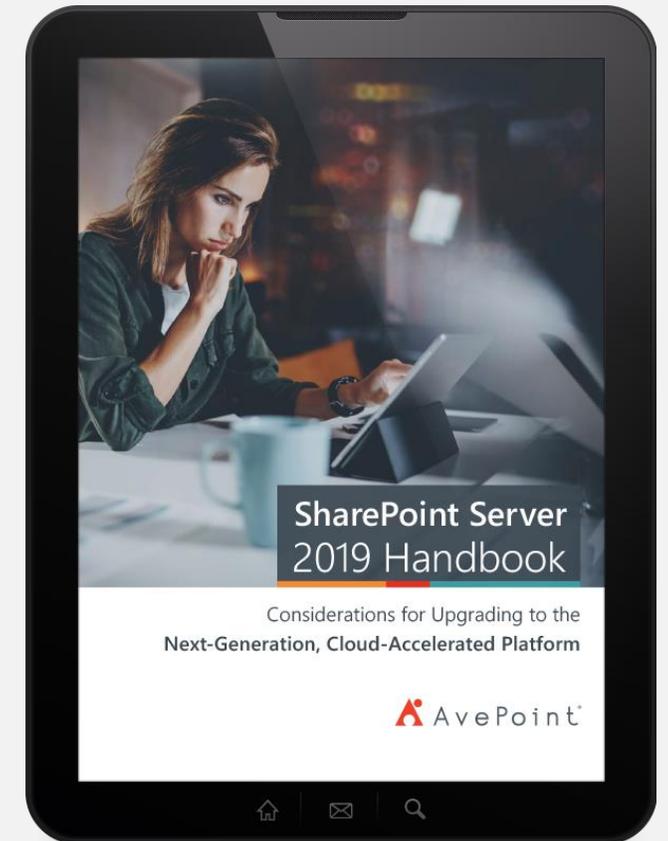

Four options:

1. Stay with your current deployment (no migration)
2. Migrate to SharePoint 2019 On-Premises only
3. Use SharePoint 2019 Hybrid
4. Go all in Office 365 / SharePoint Online

Modernize your Intranet:

1. Use Modern Sites, Web Parts and further collaboration improvements
2. Deploy OneDrive NGSC to enable your company for mobile working
3. Map and improve existing legacy processes to Flow and PowerApps
