“Conversations” are at the heart of Team collaboration

- Follow/unfollow channel to be notified of all activity
- @Mention people or the Team to alert them to your message regardless of their follow status
- Only users that have favorited a channel get notified if you @Mention the Channel itself

The basic shape of a Team

The structure of a real-life Team

The screenshot illustrates the structure of a real-life Team in Microsoft Teams. On the left, the 'Favorites' list shows the 'US-PubSec' team, which is highlighted with a red box and labeled 'The TEAM' with a red arrow. Below it, the 'Channels' list is shown, with 'Knowledge Channel' highlighted by a teal box and labeled 'The Team's CHANNELS' with a teal arrow. The 'Knowledge Channel' is further detailed with a list of tabs: 'Conversations', 'Files', 'AP Wiki', 'AP University', 'L&L Planner', 'Resources', and '1 more'. The 'Conversations' tab is highlighted with an orange box and labeled 'Channel TABS' with an orange arrow. The main content area shows a message from 'Taylor Davenport' dated 7/26 1:13 PM, titled 'Following Group Emails in Outlook'. The message includes a quick reminder to follow the US-Federal Group in Outlook and a link to a screenshot. The screenshot shows the Outlook interface with the 'SLED TEAM' group selected, and a 'Follow the Group' button highlighted with a red box.

Following Group Emails in Outlook

Hey US-Federal,

Quick reminder, be sure to "follow" the US-Federal Group in Outlook so you receive emails sent to the distro in your inbox. You can find instructions [HERE](#) or take a look at the screenshot below. Taylor will be sending out important messages via these distros, please follow ACAD if you are not already.

The Difference between TEAMS and CHATS

Team Conversations

- Visible to all Team members/owners
- Uploaded files go into the SharePoint folder for the Channel
- Conversation history goes into the Team mailbox for compliance needs (hidden)
- Notifications will be sent to those following the Channel + those who are @mentioned

Chats

- Visible only to those in the chat
- Uploaded files go into the OneDrive of the poster and are shared with current chat participants automatically
- Chat history goes into the participants mailboxes for compliance needs (hidden)
- Notifications will be sent to participants

Understanding the SharePoint and Teams relationship

Where Are My Conversations Stored?

Chat service

In memory processing for speed

Leverages Azure storage (blob, tables, queues)

Substrate / Exchange

Chat and channel messages are also stored in Exchange for information protection

Conversation images & media

Inline Images/Stickers are stored in a media store,
Giphys are not stored.

Where Are My Files Stored?

1:N chats

Files are uploaded to OneDrive for Business and permissions are set for the members of the chat

Team conversations

Files are uploaded to SharePoint. A folder is associated with each channel in the team

Cloud storage

Dropbox, Box, Citrix ShareFile, Google Drive

External Access

Anyone with an Azure Active Directory (AAD) account can be added as a guest in Teams.

Guests ...

Can have any email account (Work accounts e.g. Office 365)

Accounts are added and securely managed on Azure AD through Azure AD B2B Collaboration

IT admins can quickly and easily view, add, or revoke a guest's access to the host tenant

Are included as part of your Office 365 subscription at no additional cost

Are subject to Azure AD & Office 365 service limits

By default, anyone can create an Office 365 group. Therefore, anyone can create a team in Microsoft Teams. However, history has shown that allowing this privilege to go ungoverned can result in users creating workspaces on impulse. Such workspaces often become abandoned, because their creators fail to promote them. Ultimately, people wonder why the workplaces were created in the first place. For example, you may recall the early days of SharePoint Server. Some enterprises saw the creation of hundreds, perhaps thousands, of sites, with little thought given to why those sites were needed.

Step 1: Make it easy to do the right thing

Specify rules of engagement

Focus on business scenarios or initiatives

Enforce & automate governance

Example: Make meetings better

Example: Focus on Business Scenarios

Engineering, Research & Development

Share best practices across geographies

Operations, Manufacturing & Logistics

Improve and monitor business processes

Sales, Marketing, PR & Communications

Align Sales and Marketing teams

HR & Legal Services

Gather & process forms from employees

Accounting, Finance & Procurement

Pull data and build financial reports

Administration

Organize teams and manage calendars

The image displays a presentation slide for AvePoint's Cloud Governance for Office 365, overlaid on a screenshot of a Skype chat window. The slide features the AvePoint logo at the top left. The main heading is "Cloud Governance for Office 365", followed by the sub-heading "Automate provisioning, management, & lifecycle of Office 365". Below this, a paragraph states: "Implement an extensible Office 365 governance strategy that empowers users, is easy to maintain and scales as your organization adopts to the cloud." At the bottom of the slide, the heading "Governance & security" is partially visible, with the text "Empower end users with self-service IT for lifecycle operations. Transcend rigid provisioning services for Groups, Teams, and sites, and" below it. The background of the slide includes a colorful circular graphic. The Skype chat window in the background shows a conversation with a contact named "Pretty Safe". The chat history includes a green message bar, a date separator for "April 16, 2018", a blue message bar, a date separator for "May 22, 2018", and another date separator for "September 17, 2018". The Windows taskbar at the bottom shows the time as 9:17 PM on 9/19/2018, along with icons for Chrome, a red square icon, and "Demo Logins".

Microsoft Teams

Day in the life – IT Project Manager

Jamal is an IT project manager with Contoso Technologies and is responsible for making sure IT projects are meeting stakeholders needs, and delivered on time and within budget.

7:45 AM

Jamal uses his Teams mobile app to get up to speed the activity feed as he travels to work and joins the daily stand up call remotely.

8:30 AM

At the office, he navigates to the Visual Studio Online dashboard tab in Teams. Jamal reviews his projects and notes a few trends that are concerning.

9:30 AM

On Teams he asks for additional data points related to projects risks and @ mentions specific individuals to get their attention.

11:30 AM

Jamal joins a project review meeting in Teams, shares his screen, and navigates to the Planner tab to review key activities by owner and adjusts due dates.

2:00 PM

He prepares his meeting notes and replays the Teams cloud based meeting recording for things that he may have missed. He @mentions the channel with updates and action items in Planner.

3:30 PM

Jamal gets notified in Teams of a new bug that was posted in the channel from the Visual Studio Online connector. He @ mentions experts to help to resolve in time for their release date.

4:30 PM

In Teams he goes to the Financial app tab to update current resource costs for several of his projects.

6:00 PM

Jamal receives another notification from Visual Studio Online notifying him that the bug is being resolved. He prepares for his weekly status report and posts it into the PMO Teams site @mentioning the team.

Make it relevant to their role

Step 4: Develop Contextual Learning

Use case driven

On-demand

Always have a call to action

Example: Microsoft Teams for Sales

Bring together content, people, and tools in one place

As a sales manager, you work with many different tools and people. **Microsoft Teams** is a digital, chat-based workspace for today's teams. After setting up a group in a Teams channel, you can email the entire channel, send attachments, and receive notifications from all posts in a channel. Channels bring together chat, content, people, and tools in one place so everyone has instant access to everything they need. You can set up different groups for specific workflows like account transitions or customer feedback.

Next: Intro to Microsoft Teams

With Microsoft Teams on your PC, Mac, or mobile device, you can:

- Pull together a team.
- Use chat instead of email.
- Securely edit files at the same time.
- See likes, @mentions, and replies with just a single tap.
- Customize it by adding notes, web sites, and apps.

What is Microsoft Teams?

A person with dark curly hair, wearing a red shirt, is sitting at a desk and using a laptop. The laptop screen shows a video player with a play button overlay. The video content shows the same person at the laptop, with speech bubbles and a star icon floating around them. The background of the video player is a solid blue color.

Example: Move email addicts to Teams

Your email...

- Forces YOU to separate your inbound communication
- Requires YOU to configure complex rules to ensure relevant information is surfaced and noise is reduced
- Notifies you on ALL new messages
- EVERY message goes into a recipient's mailbox

A team...

- AUTOMATICALLY separates your inbound communication into Channels
- Let's you TUNE IN to what you care about and tune out what you don't
- Notifies you only for messages you EXPLICITLY care about
- @mentions allow you to poke recipients only when relevant

【When to use Teams vs other tools?】

Understanding the advantages and disadvantages of each tool helps you and your end users choose the right tool for the right occasion:

	Microsoft Teams	Yammer	E-Mail / Outlook	Skype for Business	SharePoint	Groups in Outlook
Speed	Fast Suitable for instant communication	Varies Can be used for communications of any speed	Slow Difficult to know if your email has been read or when you will hear back	Fast Suitable for instant communication	Slow When a document is shared via another tool, users find and access materials as they need it.	Varies Message is sent through Outlook. Difficult to know when you will hear back.
Audience	Small Designed for smaller, close-knit teams	Large More suitable for organization-wide communication or collaboration across departments	Varies Can be used for audiences of any size	Small Typically one-to-one or one-to-few	Varies While some sites can be limited to just team members, other SharePoint sites are designed for company-wide access	Small Designed for smaller, close-knit teams
Tone	Informal Personal and conversational. Suitable for team members who know each other well	Varies Mix of conversational and professional	Formal Professional. For instance, for sending contracts to clients	Varies Tone depends on the mix of people on messaging / calls and the situation	Formal Communication within SharePoint sites is typically brief and formal, directing users where content is and how it should be managed	Varies Tone depends on the mix of people on messaging / calls and the situation
Sharing of information	Very easily shared Information is shared with a specific group of people and in various formats and methods (shared library, networks, chats, or app integrations)	Easily shared Accessed once uploaded, however, you may lose track of specific content when you follow many feeds and groups. Idea for referencing content and not collaboration.	Not easily shared If it lies in attachment form - forwarding back and forth makes it hard to track. Attachments are better shared via OneDrive for Business	Not easily shared Attachments become downloaded files on your local drive. Manual maneuvering is required to share	Very easily shared and accessed Primarily a document management and storage system. Trouble co-editing from a single version of truth.	Easily Shared It lies in attachment form and stored in the Office 365 Groups document library / files repository.
Knowledge transfer	Easily transferred Change in membership has no impact on content availability. Newly added members have access to conversations and files accumulated from the start	Very easily transferred If your organization is consistent in tagging topics and if groups are maintained well, newly added users can easily find what they need moving forward	Not easily transferred Knowledge contained within the mailbox is lost to others after a user's account is deactivated	Not easily transferred Downloaded files and conversation history will be lost to others after a user's account is deactivated	Easily transferred Data is organized for new team members to easily locate and leverage even if the content producer's account is deactivated	Easily transferred Change in membership has no impact on content availability. Newly added members have access to group conversations and files accumulated from the start
Confidentiality	Medium/Low If default settings are not managed properly, confidential information can be exposed to those who should not see it	Low High visibility organization-wide means this is suitable for exchanging confidential or private information	High Only sender and recipient have the email and its content. Outlook users can restrict access to email using Office 365 Message Encryption or data information Protection templates. Can be accidentally forwarded to wrong parties	Medium Only sender and recipient have the conversation history and files	Medium/Low Users can choose to make their site public or private to a select group of users. Access to authorized groups is easily pronounced. Sensitive data may require extra safeguards for compliance	Medium/Low If default settings are not managed properly, confidential information can be exposed to those who should not see it

Office 365 Groups can be described as:

- A collection of people with a common purpose (a department, a project, a client etc.)
- ...That are armed with tools for collaboration (Teams, SharePoint, Yammer etc.)
- ...And who collaborate internally, externally or both (internal clients)
- ...With an appropriate level of transparency (public/private)

Employee Onboarding

Bring new employees into the department's team from day one and provide a real-time resource of information. Help new employees get up to speed as quickly as possible.

Issue

We currently have a formal onboarding process to inform new employees of processes and resources, however there are limited opportunities to educate them about our departmental culture and create a sense of inclusiveness.

Solution

Bring employees onto Microsoft Teams on their first day at the organization. By creating early adoption, employees are more likely to participate in conversations – and do so more frequently - and will be more informed at an early stage in their tenure. Employees will also be able to see conversations that happened prior to their start date, to speed up their awareness.

Benefits

- Increase adoption
- Convey department culture and benefits to employees early on
- Live FAQs for new employees
- Historically searchable

Success Metrics

- Use of Microsoft Teams by new employees
- Employee survey response after 90 days

Owner & Timeline

- HR team and Departmental Managers
- Before Summer 2019 hiring season

Example: 90 Day Plan
