“Conversations” are at the heart of Team collaboration

- Follow/unfollow channel to be notified of all activity
- @Mention people or the Team to alert them to your message regardless of their follow status
- Only users that have favorited a channel get notified if you @Mention the Channel itself

The basic shape of a Team

The structure of a real-life Team

The screenshot illustrates the structure of a real-life Team in Microsoft Teams. On the left, the 'Favorites' list shows the 'US-PubSec' team, which is highlighted with a red box and labeled 'The TEAM' with a red arrow. Below it, the 'Knowledge Channel' is highlighted with a teal box and labeled 'The Team's CHANNELS' with a teal arrow. The right side of the image shows the 'US-PubSec > Knowledge Channel' view, with the channel tabs (Conversations, Files, AP Wiki, AP University, L&L Planner, Resources, 1 more) highlighted with an orange box and labeled 'Channel TABS' with an orange arrow. A message from Taylor Davoport is visible, titled 'Following Group Emails in Outlook', with a red box around the 'Follow the Group' button in the screenshot below it.

The Difference between TEAMS and CHATS

Team Conversations

- Visible to all Team members/owners
- Uploaded files go into the SharePoint folder for the Channel
- Conversation history goes into the Team mailbox for compliance needs (hidden)
- Notifications will be sent to those following the Channel + those who are @mentioned

Chats

- Visible only to those in the chat
- Uploaded files go into the OneDrive of the poster and are shared with current chat participants automatically
- Chat history goes into the participants mailboxes for compliance needs (hidden)
- Notifications will be sent to participants

Understanding the SharePoint and Teams relationship

The screenshot shows the Microsoft Teams interface for a team named "BGLeads". The left sidebar contains navigation icons for Activity, Chat (with a red notification bubble containing the number 2), Teams (with a red notification bubble containing an @ symbol), Meetings, and Calls. The main area displays the team name "BGLeads" with a red logo icon and a three-dot menu. Below the team name, a list of channels is shown: "General" (highlighted), "BG Virtual Stand-up", "BG-Dev Workshop 2018", "GTM-Sales", "Product Strategy", "Project Tasks", "SP 2019", "Technical Partnerships", and "2 more channels".

The screenshot shows the SharePoint document library for the "BGLeads" private group. The top bar includes a blue square icon with the letter "B" and the text "BGLeads Private group". Below this, there are action buttons: "+ New", "Upload", "Quick edit", "Sync", and "Export to Excel". The main content area is titled "Documents" and displays a table of files and folders.

Give users a place to look for lost content:

- Filenames that can't be found
- Documents modified recently
- Broken URLs to documents and files
- Lost e-mails that can't be searched in Exchange / Outlook

Highlight quick-wins to limit support calls:

- Identify version history, first and second level recycle bins, soft-deleted content
- Identify recent data in AvePoint's backup data sets
- Fully security-trimmed to each user

Why Gartner

Gartner delivers the technology-related insight you need to make the right decisions, every day.

[Find out more](#) ▶

By default, anyone can create an Office 365 group. Therefore, anyone can create a team in Microsoft Teams. However, history has shown that allowing this privilege to go ungoverned can result in users creating workspaces on impulse. Such workspaces often become abandoned, because their creators fail to promote them. Ultimately, people wonder why the workplaces were created in the first place. For example, you may recall the early days of SharePoint Server. Some enterprises saw the creation of hundreds, perhaps thousands, of sites, with little thought given to why those sites were needed.

Using Retention Policies for Teams

The screenshot displays the Microsoft 365 Security & Compliance center interface. The top navigation bar shows "Office 365" and "Security & Compliance". The left sidebar lists various security and compliance features, with "Retention" highlighted. The main content area shows the "Create a policy to retain what you want and get rid of what you don't" wizard. The wizard is currently on the "Name your policy" step, which is indicated by a green checkmark. Below this, there are options for "Settings", "Choose locations", and "Review your settings". The "Choose locations" step is currently selected, showing a list of locations with toggle switches. The locations include Office 365 groups, Skype for Business, Exchange public folders, Teams channel messages, and Teams chats. The Teams channel messages and Teams chats locations have additional options for "All", "None", "Choose teams", and "Exclude teams".

Goal: Drive Sustainable Adoption

Sustainable Adoption Objectives

- Minimize the negative impact of making technology changes
- Promote the consistent adoption of Microsoft Teams
- Provide users with the resources they need to be successful

How do you create a sustainable adoption plan?

Step 1: Make it easy to do the right thing

Specify rules of engagement

Focus on business scenarios or initiatives

Enforce & automate governance

Example: Make meetings better

Example: Focus on Business Scenarios

Engineering, Research & Development

Share best practices across geographies

Operations, Manufacturing & Logistics

Improve and monitor business processes

Sales, Marketing, PR & Communications

Align Sales and Marketing teams

HR & Legal Services

Gather & process forms from employees

Accounting, Finance & Procurement

Pull data and build financial reports

Administration

Organize teams and manage calendars

Stuff for events
Hi Field Marketing!

As we have many upcoming events in autumn, I would like to get some new branded assets.
I was wondering if you can share pictures of the stuff you have in your regions? I appreciate any help 😊
I am looking to get new

- T-Shirts or Shirts for Event Staff
- Booth (a magnetic one maybe)
- Best raffle gifts

Have a great weekend all!

Annie Wang when ya get a free min, pls share graphic and images for t-shirts produced at our NL Events.

Martina Dingis 7/27 10:46 AM
Got those from Annie Wang already 😊 thanks AnnMarie Connolly

Adeline Boror 7/30 8:32 AM
Hi Martina Dingis we don't do shirt or tshirt in France I did order some name badges in metal with magnetic fittings (see attached)
Regarding price draw I shared with you the 3D printer which is not expensive only 150 euros link here : https://www.gearbest.com/3d-printers-3d-printer-kits/pp_969800.html?wid=1433363

Microsoft Teams

Day in the life – IT Project Manager

Jamal is an IT project manager with Contoso Technologies and is responsible for making sure IT projects are meeting stakeholders needs, and delivered on time and within budget.

7:45 AM

Jamal uses his Teams mobile app to get up to speed the activity feed as he travels to work and joins the daily stand up call remotely.

8:30 AM

At the office, he navigates to the Visual Studio Online dashboard tab in Teams. Jamal reviews his projects and notes a few trends that are concerning.

9:30 AM

On Teams he asks for additional data points related to projects risks and @ mentions specific individuals to get their attention.

11:30 AM

Jamal joins a project review meeting in Teams, shares his screen, and navigates to the Planner tab to review key activities by owner and adjusts due dates.

2:00 PM

He prepares his meeting notes and replays the Teams cloud based meeting recording for things that he may have missed. He @mentions the channel with updates and action items in Planner.

3:30 PM

Jamal gets notified in Teams of a new bug that was posted in the channel from the Visual Studio Online connector. He @ mentions experts to help to resolve in time for their release date.

4:30 PM

In Teams he goes to the Financial app tab to update current resource costs for several of his projects.

6:00 PM

Jamal receives another notification from Visual Studio Online notifying him that the bug is being resolved. He prepares for his weekly status report and posts it into the PMO Teams site @mentioning the team.

Example: A Day in the Life

Make it relevant to their role

Step 4: Develop Contextual Learning

Use case driven

On-demand

Always have a call to action

Example: Microsoft Teams for Sales

Bring together content, people, and tools in one place

As a sales manager, you work with many different tools and people. **Microsoft Teams** is a digital, chat-based workspace for today's teams. After setting up a group in a Teams channel, you can email the entire channel, send attachments, and receive notifications from all posts in a channel. Channels bring together chat, content, people, and tools in one place so everyone has instant access to everything they need. You can set up different groups for specific workflows like account transitions or customer feedback.

Next: Intro to Microsoft Teams

What is Microsoft Teams?

With Microsoft Teams on your PC, Mac, or mobile device, you can:

- Pull together a team.
- Use chat instead of email.
- Securely edit files at the same time.
- See likes, @mentions, and replies with just a single tap.
- Customize it by adding notes, web sites, and apps.

Example: Move email addicts to Teams

Your email...

- Forces YOU to separate your inbound communication
- Requires YOU to configure complex rules to ensure relevant information is surfaced and noise is reduced
- Notifies you on ALL new messages
- EVERY message goes into a recipient's mailbox

A team...

- AUTOMATICALLY separates your inbound communication into Channels
- Let's you TUNE IN to what you care about and tune out what you don't
- Notifies you only for messages you EXPLICITLY care about
- @mentions allow you to poke recipients only when relevant

When to use Teams vs other tools?

Understanding the advantages and disadvantages of each tool helps you and your end users choose the right tool for the right occasion:

	Microsoft Teams	Yammer	E-Mail / Outlook	Slack for Business	SharePoint	Groups in Outlook
Speed	Fast Suitable for instant communication of any speed	Varies Can be used for communications of any speed	Slow Difficult to know if your email has been read or when you will hear back	Fast Suitable for instant communication	Slow When a document is shared via another tool users find and access materials as they need it.	Varies Message is sent through Outlook. Difficult to know when you will hear back.
Audience	Small Designed for smaller, close-knit teams	Large More suitable for organization-wide communication or collaboration across departments	Varies Can be used for audiences of any size	Small Typically one-to-one or one-to-few	Varies While some sites can be limited to just team members, other SharePoint sites are designed for company-wide access	Small Designed for smaller, close-knit teams
Tone	Informal Personal and conversational. Suitable for team members who know each other well	Varies Mix of conversational and professional	Formal Professional. For instance, for sending contracts to clients	Varies Tone depends on the mix of people on messaging / calls and the situation	Formal Communication within SharePoint sites is typically brief and formal, directing users where content is and how it should be navigated	Varies Tone depends on the mix of people on messaging / calls and the situation
Sharing of information	Very easily shared Information is shared with a specific group of people and in various formats and methods: shared library, network, chat, or app (integrating)	Easily shared Accessed once uploaded. However, you may lose track of specific content when you follow many feeds and groups. Idea for referencing content and not collaboration.	Not easily shared If it lies in attachment form - forwarding back and forth makes it hard to track. Attachments are better shared via OneDrive for Business	Not easily shared Attachments become downloaded files on your local drive. Manual maneuvering is required to share	Very easily shared and accessed Primarily a document management and storage system. Trouble co-editing from a single version of truth.	Easily Shared It lies in attachment form and stored in the Office 365 Groups document library / files repository.
Knowledge transfer	Easily transferred Change in membership has no impact on content availability. Newly added members have access to conversations and files accumulated from the start	Very easily transferred If your organization is consistent in tagging topics and if groups are maintained well, newly added users can easily find what they need moving forward	Not easily transferred Knowledge contained within the mailbox is lost to others after a user's account is deactivated	Not easily transferred Downloaded files and conversation history will be lost to others after a user's account is deactivated	Easily transferred Data is organized for new team members to easily locate and leverage even if the content producer's account is deactivated	Easily transferred Change in membership has no impact on content availability. Newly added members have access to group conversations and files accumulated from the start
Confidentiality	Medium/Low If default settings are not managed properly, confidential information can be exposed to those who should not see it	Low High visibility organization-wide means this is unsuitable for exchanging confidential or private information	High Only sender and recipient have the email and its content. Outlook users can restrict access to email using Office 365 Message Encryption or Active Information Protection templates. Can be accidentally forwarded to wrong parties	Medium Only sender and recipient have the conversation history and files	Medium/Low Users can choose to make their site public or private to a select group of users. Access to authorized groups is easily pronounced. Sensitive data may require extra safeguards for compliance	Medium/Low If default settings are not managed properly, confidential information can be exposed to those who should not see it

Office 365 Groups can be described as:

- A collection of people with a common purpose (a department, a project, a client etc.)
- ...that are aimed at tools for collaboration (Teams, SharePoint, Yammer etc.)
- ...and who collaborate internally, externally or both internal/external
- ...with an appropriate level of transparency (public/private)

Step 5: Create Your 90 Day Plan

Identify specific use cases

Conduct pilot

Launch company wide

Example: Identify Business Use Case

Example: Business Use Case

Employee Onboarding

Bring new employees into the department's team from day one and provide a real-time resource of information. Help new employees get up to speed as quickly as possible.

Issue

We currently have a formal onboarding process to inform new employees of processes and resources, however there are limited opportunities to educate them about our departmental culture and create a sense of inclusiveness.

Solution

Bring employees onto Microsoft Teams on their first day at the organization. By creating early adoption, employees are more likely to participate in conversations – and do so more frequently - and will be more informed at an early stage in their tenure. Employees will also be able to see conversations that happened prior to their start date, to speed up their awareness.

Benefits

- Increase adoption
- Convey department culture and benefits to employees early on
- Live FAQs for new employees
- Historically searchable

Success Metrics

- Use of Microsoft Teams by new employees
- Employee survey response after 90 days

Owner & Timeline

- HR team and Departmental Managers
- Before Summer 2019 hiring season

Example: 90 Day Plan

Month 1

- Identify 3 use cases for Teams
- Engage leadership and secure buy-in
- Develop rules of engagement and how-to resources

Month 2

- Engage 3 departments/groups to pilot Teams use cases
- Identify what works and what doesn't with use cases then modify
- Configure Teams to support use cases for company wide deployment

Month 3

- Launch use cases company wide
- Encourage leadership to consistently promote and adopt the use cases
- Showcase and highlight wins of adopting Teams
