AVEPOINT PROJECT TRANSPARENCY
FOR MICROSOFT CITYNEXT

Whether you're trying to improve citizen satisfaction, build public trust, or improve internal operations, government organizations need to deliver relevant project information to the right people, at the right time.

By integrating familiar tools – like Microsoft Office, Windows, smartphones, and web-based technologies – AvePoint Project Transparency aggregates public programs and projects into a centralized, user-friendly system. With Project Transparency, government agencies can now easily work together – instead of in data silos – and better deliver results to their constituents.

INCREASE TRANSPARENCY	IMPROVE REPORTING	OPTIMIZE PROJECT CONTROL	EMBRACE BUSINESS INTELLIGENCE (BI)
Present key metrics and milestones to citizens and stakeholders while maintaining internal data integrity and governance. Transform project data into actionable information across all levels with visual reports and dashboards. More effectively collaborate, control, and report on projects with heightened visibility across teams and departments	Gauge the current overall status and health of your agency using tailored executive dashboards. Implement a centralized, user-friendly task system so project managers can better organize, update, and maintain team accountability on the fly. Allow for proactive decision-making with real-time data and trend reports.	Increase cost-efficiency and productivity by providing a centralized management system to better allocate resources across multiple programs. Avoid delays and budgeting crises caused by scarcity and the over-allocation of goods and services.	Eliminate time and effort spent manually sifting, gathering, and consolidating project data by viewing streamlined visual representations of key performance indicators (KPIs) and trend analysis. Make pivotal organizational improvements and bigger public impact through the utilization of BI and knowledge sharing.

PROVIDE YOUR STAKEHOLDERS WITH ENHANCED PROJECT CONTROL, REPORTING, & FULL TRANSPARENCY.

AvePoint Project Transparency facilitates awareness of public project information and current agency trends to your core stakeholders – your project management and government executives, as well as your constituents. By streamlining project management processes, your core stakeholders can easily report on and disseminate valuable project data from day one as actionable information surfaces via reports and dashboards.

SIMPLIFIED PROJECT MANAGEMENT. GREATER CITIZEN SERVICES.

Powered by: AvePoint® · Office 365 · Project · SharePoint · Yammer

FOR CITIZENS & PUBLIC OVERSIGHT:

- Build public trust by granting citizens easy, unprecedented access to public project data and ongoing public project information.
- Well-informed citizens learn how programs will affect their community and constituents understand how their tax dollars are being spent.

FOR THE PROJECT TEAM:

- Deep, practical integration with familiar Microsoft Office tools drives usability and adoption.
- Monitor tasks and actuals, submit task statuses, flag issues and risks, respond to management scheduling, complete timesheets and project reports, and receive issue and risk notifications from anywhere, anytime, on any device.

FOR PROJECT MANAGEMENT:

- Organize and centralize vast program data for immediate availability and resource allocation via utilization and assignment tracking, commitment enforcement, and scheduling.
- Effectively promote best practices across projects, programs, and teams by comparing performance with standardized KPIs and trending project data.
- Simplify the management process with effortless distribution of information to executives and management through dashboards and roll-up reporting.

FOR EXECUTIVES & CIVIC LEADERS:

- Receive valuable information from the expanse of the organization through real-time reports and dashboards.
- Measure progress and trends against a set of KPIs.
- Continually monitor and improve management strategies using modern business intelligence tools whenever new data becomes available.
- Easily share performance data with other municipalities, stakeholders, and projects to promote awareness while ensuring the information in dashboards is protected and compliant.
