AvePoint Solutions help remove roadblocks, transform business processes, and get you to Office 365 the right way

- Easily improve productivity
- Minimize disruptions while onboarding
- Unclutter information for users
- Collaborate more effectively
- Automate business processes

AvePoint Online Services help gain control of your company's data by migrating from various siloed and unsecure storages to OneDrive for Business

- Gain control of company data
- Consolidate and secure unmanaged data
- Easily scale storage to business needs
- Minimize repetitive admin functions
- Securely access information from anywhere

DocAve Archiver, with StorSimple, offer a scalable, hybrid cloud storage solution, keeping active data on-premises, while pushing archived data to Azure

- Automate archiving
- Remove clutter from searches
- Search archived data faster
- Reduce hardware costs
- Adhere to legal requirements

"We want to put as much information in our cloud environment as possible, and we don't want to be limited over concerns of not being able to control the security settings."

- Betsy Pope, Director, CD Group
